SUMMARY

Senior software engineer with 6+ years across the stack. Currently building autonomous AI agent platforms for production incident triage and contributing to Anthropic's Model Context Protocol catalog ecosystem. Specializes in Elixir / OTP, distributed systems, PostgreSQL trigram search, and on-prem LLM workflows. Official author of **mcp-server-graylog** in Anthropic's MCP catalog.

EXPERIENCE

Senior Software Engineer

2022-09 → Present

Scripbox · Bengaluru, India

- ▶ Designed and shipped **Echo** – an autonomous AI agent platform triaging **200+ production errors daily** across **9 Sentry channels** and **5 services** (Sentry · Graylog · Asana · GitLab · Metabase). Reduced incident triage from 15–30 min/error to fully automated. Containerized via Podman for workload isolation. **Shortlisted from 54 submissions** at Scripbox AI Hackathon 2026.
- ▶ Built and published **mcp-server-graylog v2.0.1** – accepted into Anthropic's official Model Context Protocol catalog (**PR #2913**, 2025-10-18). 6 tools enabling AI agents to query production logs via natural-language Lucene translation. npm · MIT.
- ▶ Built **Memory MCP server** in Elixir + PostgreSQL with trigram similarity search. **96.5% workflow token reduction**. **94%+ duplicate-detection accuracy** across automated triage pipeline.
- ▶ Automated bug triage: **5,979 KB entries** semantically classified across **15 services**. Auto-routing maps **29 ticket types** → **18 owners**. Anti-hallucination guardrails reduced triager failure rate from 37.5%.
- ▶ Shipped Phoenix LiveView admin tool with RBAC, Sentry + Graylog integration. **MTTR -45%**.
- ▶ PostgreSQL query optimization: **2.5s** → **80ms** (96% reduction) on user-facing reads.
- ▶ ETS + in-memory caching layer: **API latency -60%**, **throughput 3×** on hot paths.
- ▶ Increased test coverage **45%** → **85%**; reduced prod bug rate by **70%** via ExUnit + integration suite.
- ▶ Zero-downtime CI/CD for Elixir umbrella applications: **-40% deploy time**.
- ▶ Benchmarked **12 NVIDIA NIM models** × **4 production scenarios** (sentry analysis · ticket classification · code fix · multi-tool Q&A). Published Medium deep-dive (~3,500 words).
- ▶ Mentored team on Elixir best practices, OTP supervision patterns, and AI agent system design.

Software Engineer

2019-07 → 2022-09

SAKHA Global Private Limited · Bengaluru, India

- ▶ Led **5-engineer frontend team** building responsive web applications for mobile and desktop platforms.
- ▶ Built features in HTML / CSS / JavaScript meeting enterprise client requirements; set coding standards and review process across the team.

OPEN SOURCE & RECOGNITION

mcp-server-graylog – Anthropic MCP Catalog
v2.0.1 · 6 tools · npm · MIT · accepted 2025-10-18 (PR #2913) · github.com/Pranavj17/mcp-server-graylog
Official MCP server for Graylog log aggregation. Enables AI systems to query and correlate production logs across distributed services in natural language.

Echo · AI Agent Automation Platform – Live Production System (Scripbox)
9 Sentry channels · 5 services · 5,979 KB entries · 200+ errors triaged daily · 8 OpenClaw skills
Demo: pranavj17.github.io/echo-demo-v2

Memory MCP Server – Elixir · PostgreSQL
Trigram similarity search · workflow orchestration · 96.5% token reduction · 94%+ dedup accuracy

Form Builder DSL – Open source · Elixir
github.com/Pranavj17/form_builder_dsl · Compile-time validated structured form definitions

Scripbox AI Hackathon 2026 – Finalist
Shortlisted from 54 submissions · built & demoed Echo voice assistant in 12-min live segment

SKILLS

Languages Elixir (OTP · Phoenix · Ecto · ExUnit) · Ruby · JavaScript / TypeScript · Python (learning) · SQL

Stores PostgreSQL (pg_trgm · GIN indexes · trigram search) · Redshift · Elasticsearch · Redis · ChromaDB

AI / MCP Model Context Protocol · Claude API · Ollama (local inference) · NVIDIA NIM · vector embeddings · prompt engineering

Infra GitLab CI/CD · GitHub Actions · Podman · Docker · Cloudflare Workers · Helm · Kubernetes

Observability Sentry · Graylog · Metabase · Linear · Asana

EDUCATION

Bachelor of Engineering · Mechanical Engineering 2015 - 2019
Dayananda Sagar College of Engineering · Bangalore · CGPA 7.75

WRITING · [MEDIUM.COM/@JPRANAV97](https://medium.com/@jpranav97)

- **How to Fine-Tune a Small Language Model in 2026 – Without Wasting a Weekend** (May 2026)
- **I Benchmarked 21 NVIDIA NIM Free-Tier Models on Real Production AI-SRE Workloads** (Apr 2026)
- **Building an AI-Powered DevOps Assistant: Automating Sentry Reviews with OpenClaw** (Mar 2026)
- **Zero-Cost Code Reviews: Self-Hosted Qwen2.5-Coder on GitLab CI** (Nov 2025)
- **Stop Wasting Tokens: How to Optimize Claude Code Context by 60%** (Nov 2025)
